

CIRCLE REDMONT®
LIGHT PENETRATING SYSTEMS

91P™

PLANK GLASS + METAL

Light Penetrating Systems

About Us

91R™ steel and plank glass panels are the best choice for projects seeking maximum glass coverage and the highest illumination available. 91R™ panels incorporate custom plank glass units in a structural metal framework engineered for each project's unique requirements. 91R™ panels may be installed as skylights, decklights, stair treads, riser and landings, flooring, bridges, sidewalks, canopies and other creative applications.

Why us?

1. Circle Redmont's rich product history dates back to the late 1800's.
2. Waterproofed panels can incorporate a variety of plank glass sizes.
3. Engineered to take 100lbs per square foot or greater live load capacity.
4. Standard and custom plank glass sizes available.
5. A variety of custom frame colors and plank glass options are available.
